Hyper-V 2008 and up

Configurable Recovery Point

In a perfect world everything would be instantly recoverable but with limited business budgets we know that allowing you to choose the priority of recovery will not only meet your business compliance requirements but also your budgets. Our expert consultants will identify recovery points and recovery time objectives inline with your compliance and budget then map them to our disaster recovery cloud sites.

Monitoring

All disaster recovery solutions implemented using System Architects DRaaS are monitored to make sure that the system is running and is available at a moment's notice. Regular Disaster Recovery Tests identify and resolve issues to reduce the risk of a failed recovery attempt. Each test is documented and a custom report is provided for your regulatory, contractual or insurance requirements as well as your peace of mind.

Managed Disaster Recovery

When disasters occur you are not alone, System Architects Disaster Recovery Technicians are trained in your specific disaster recovery protocols and will initiate and monitor the recovery process, providing regular status updates at predetermined checkpoints until you have resumed normal operations.

Back to Business as Usual

System Architects' Disaster Recovery as a Service provides the ability to fail back to your primary sites once the disaster is over and normal services have been restored without the need for prolonged downtime.
