Software Development Services

System Architects' software development services provide development resources in both Canada and India allowing your business to develop complex proprietary software solutions that are cost effective.

Software Development services from System Architects can be combined with other System Architects' services to allow for a true end to end solution from ongoing support, hosting and even level one and two helpdesk support for your custom software solution.

Team Structure

You can engage single resources or full teams based on your project requirements. Additionally, you can self manage the teams or have System Architects' PMs manage the team for you.

Cost Strucutre

Development resources can be provided on a daily or monthly rate table to fit your project timelines and budget.

Environments

System Architects' Private Cloud hosting allows you to leverage our Development, Testing and Production environments for your software project so you no longer need to maintain costly environments.

## SA SYSTEMARCHITECTS
Business IT Services

SA

Full Services
Technology Solutions

System Architects is a leading Canadian Outsourced IT Services firm providing a wide range of enterprise level IT services that today's businesses need to succeed in a global market.

A federally incorporated company based in Toronto, System Architects, established in 1997, has three offices globally, three data centres and two call centres designed to support a wide range of IT services.

32 fulltime IT staff with available capacity to support up to an additional 50 IT staff, we provide a complete range of resources capable of delivering on a wide range of IT projects.

OUTSOURCED IT SERVICES

Provides your business with a fully functioning IT department without the need to maintain full time IT staff. With a wide range of support options you can select the level of support your business needs.

SOFTWARE DEVELOPMENT

Teams that design, develop, test & provide ongoing level one and two support customized to your unique requirements, with a wide range of supported languages, database, technologies and hosting solutions.

PRIVATE CLOUD HOSTING

Three data centres across the GTA provide the cloud services that host your buisness' IT systems with seamless integration into our other IT capabilities. Its a simple & cost effective hosting solution.

CONSULTING

When it comes to IT Consulting, we have the depth and breadth to help you design and implement the correct solution. A simple retainer based model allows for an easy way for your team to engage ours.

OFFSITE BACKUP

Our two data centres provide full offsite backup services for both PCs and Servers. Your data is safe, secure and kept in Canada.

DISASTER RECOVERY

Combining our IT Consulting, Private Cloud and Enterprise Hardware capabilities we can design, deploy and support DR solutions that can fit your business goals and budget.

VOICE OVER IP

Our full range of VoIP services include fully supported and hosted PBX systems located in our Data Centres located within the Greater Toronto Area.

ENTERPRISE HARDWARE

Never again pay retail prices for your business enterprise hardware. Our wide range of partnerships and purchasing power gives you a simple cost effective way to get the infrastructure your business needs.
